Test Documentation Report

TEST PLAN

OBJECTIVES

The main goal of this testing project is to design and deploy a detailed automated testing suite of a retail information system with Selenium WebDriver framework. The purpose of the current research is to justify the functional integrity of the key business modules, i.e. User Authentication, Inventory Management and the End-to-End Checkout procedure in the Swag Labs environment. The team targets 100 percent test coverage of 20 high-priority test cases that are to be run manually thus converted to automated scripts to guarantee that the system manages both positive and negative user contributions with utmost level of reliability.

Moreover, the project can be used to test the performance of the system with different user personas and to prove the relevance of the Software Quality Assurance (SQA) principles in a real DevOps scenario. Finally, it is aimed at generating a synchronized Test Execution Report demonstrating that the system is fit to deploy to production level through requiring strict adherence to data claims and the ability to have smooth flows of navigation between all the tested retail modules.

SCOPE

- **In-Scope**
  - User authentication, inventory sorting, add/remove cart logic, product detail views, and the complete 3-step checkout flow.
- **Out-of-Scope**
  - Payment gateway integration (mocked), user registration, and database-level verification.

TOOLS USED

- **Automation Framework:** Selenium WebDriver (v4.x)
- **Runtime Environment:** Node.js (v24.11.0)
- **Language:** JavaScript (ES6+)
- **Browser:** Microsoft Edge (Chromium based)
- **SUT (System Under Test):** SauceDemo (Swag Labs)

TESTING STRATEGY

- Black Box Testing: Testing the UI without internal code access.
- Modular Testing: Dividing the 20 cases into three distinct scripts (Auth, Cart, Checkout) for Ken, Jake, and Ian.
- Positive & Negative Testing: Verifying both successful paths and error-handling paths (e.g., invalid passwords).

TEST CASES

TEST CASE 01 - VALID USER LOGIN

Test Case ID	TC-AUTH-001	**Test Case Description**	Valid User Login		
Created By	Escolar, Ken Martin	**Reviewed By**	Quendangan, Jacob Conrad M.	**Version**	v2.4.0-build.12
Tester's Name	Escolar, Ken Martin	**Date Tested**	Tuesday, March 24, 2026 at 4:00:00 AM	**Test Case (Pass/Fail)**	PASS

S #	Preconditions:
1	Internet connection is available.
2	Internet browser is open.
3	The Username/Password fields are empty by default.
4	User has existing account.

S #	Test Data
1	Username: standard_user
2	Password: secret_sauce

Test Scenario	Validate user authentication and dashboard redirection for valid Username/Password combination.

Steps #	Steps Details	Expected Results	Actual Results	Pass / Fail
1	Navigate to https://www.saucedemo.com/	The website should open.	The website loaded successfully.	PASS
2	Enter valid Username and Password.	Fields should accept input without errors.	Username and password accepted.	PASS
3	Click "Login" button.	User should be redirected to dashboard.	User redirected to Dashboard successfully.	PASS

TEST CASE 02 – USER LOGOUT LOGIC

Test Case ID	TC-AUTH-002	**Test Case Description**	User Logout Logic		
Created By	Escolar, Ken Martin	**Reviewed By**	Quendangan, Jacob Conrad M.	**Version**	v2.4.0-build.12
Tester's Name	Escolar, Ken Martin	**Date Tested**	Tuesday, March 24, 2026 at 4:03:00 AM	**Test Case (Pass/Fail)**	PASS

S #	Preconditions:
1	User is currently logged in.
2	Inventory page is visible.

S #	Test Data
1	Navigation: Burger Menu
2	Selection: Logout Link

Test Scenario	Validate session termination via sidebar.

Steps #	Steps Details	Expected Results	Actual Results	Pass / Fail
1	Click the Burger Menu icon (top left).	Sidebar menu should expand.	Sidebar menu expanded.	PASS
2	Click the "Logout" link.	Session should end.	User logged out successfully.	PASS
3	Observe the current page.	Return to Login screen.	Redirected back to login page.	PASS

TEST CASE 03 – AUTHENTICATION ERROR HANDLING

Test Case ID	TC-AUTH-003	**Test Case Description**	Authentication Error Handling		
Created By	Escolar, Ken Martin	**Reviewed By**	Quendangan, Jacob Conrad M.	**Version**	v2.4.0-build.12
Tester's Name	Escolar, Ken Martin	**Date Tested**	Tuesday, March 24, 2026 at 4:06:00 AM	**Test Case (Pass/Fail)**	PASS

S #	Preconditions:
1	Browser is at login page.
2	URL: saucedemo.com

S #	Test Data
1	Username: standard_user
2	Password: wrong_sauce

Test Scenario	Validate error message for wrong password.

Steps #	Steps Details	Expected Results	Actual Results	Pass / Fail
1	Enter valid Username.	Field accepts input.	Username entered.	PASS
2	Enter incorrect Password.	Field masked for security.	Incorrect password entered.	PASS
3	Click "Login" button.	Display error message.	"Username and password do not match" displayed.	PASS

TEST CASE 04 – LOCKED ACCOUNT VALIDATION

Test Case ID	TC-AUTH-004	**Test Case Description**	Locked Account Validation		
Created By	Escolar, Ken Martin	**Reviewed By**	Quendangan, Jacob Conrad M.	**Version**	v2.4.0-build.12
Tester's Name	Escolar, Ken Martin	**Date Tested**	Tuesday, March 24, 2026 at 4:09:00 AM	**Test Case (Pass/Fail)**	PASS

S #	Preconditions:
1	Account status: Locked.
2	Browser is open at login page.

S #	Test Data
1	Username: locked_out_user
2	Password: secret_sauce

Test Scenario	Validate login denial for locked users.

Steps #	Steps Details	Expected Results	Actual Results	Pass / Fail
1	Enter "locked_out_user" credentials.	Inputs accepted.	Credentials entered.	PASS
2	Click "Login" button.	Access denied.	Error message "Sorry, this user has been locked out" appeared.	PASS

TEST CASE 05 – REQUIRED FIELD VALIDATION

Test Case ID	TC-AUTH-005	**Test Case Description**	Required Field Validation		
Created By	Escolar, Ken Martin	**Reviewed By**	Quendangan, Jacob Conrad M.	**Version**	v2.4.0-build.12
Tester's Name	Escolar, Ken Martin	**Date Tested**	Tuesday, March 24, 2026 at 4:12:00 AM	**Test Case (Pass/Fail)**	PASS

S #	Preconditions:
1	Leave Username field blank.
2	Enter valid Password.
3	Click "Login" button.

S #	Test Data
1	Username: standard_user
2	Password: secret_sauce

Test Scenario	Validate error for missing username.

Steps #	Steps Details	Expected Results	Actual Results	Pass / Fail
1	Navigate to https://www.saucedemo.com/	Field remains empty.	No input entered.	PASS
2	Enter valid Username and Password.	Input accepted.	Password entered.	PASS
3	Click "Login" button.	Show required error.	"Username is required" error displayed.	PASS

TEST CASE 06 – SYSTEM BRANDING VERIFICATION

Test Case ID	TC-AUTH-006	**Test Case Description**	System Branding Verification		
Created By	Escolar, Ken Martin	**Reviewed By**	Quendangan, Jacob Conrad M.	**Version**	v2.4.0-build.12
Tester's Name	Escolar, Ken Martin	**Date Tested**	Tuesday, March 24, 2026 at 4:15:00 AM	**Test Case (Pass/Fail)**	PASS

S #	Preconditions:
1	Account status: Locked.
2	Browser is open at login page.

S #	Test Data
1	Username: locked_out_user
2	Password: secret_sauce

Test Scenario	Check browser tab title accuracy.

Steps #	Steps Details	Expected Results	Actual Results	Pass / Fail
1	Load the Swag Labs website.	Site metadata loads.	Site loaded.	PASS
2	Observe the Browser Tab title.	Title is "Swag Labs".	"Swag Labs" title confirmed.	PASS

TEST CASE 07 – UI COMPONENT VERIFICATION

Test Case ID	TC-AUTH-007	**Test Case Description**	UI Component Verification		
Created By	Escolar, Ken Martin	**Reviewed By**	Quendangan, Jacob Conrad M.	**Version**	v2.4.0-build.12
Tester's Name	Escolar, Ken Martin	**Date Tested**	Tuesday, March 24, 2026 at 4:18:00 AM	**Test Case (Pass/Fail)**	PASS

S #	Preconditions:
1	Internet connection is stable.
2	Browser is open.
3	User is on the landing page.

S #	Test Data
1	Element ID: .login_logo
2	Expected Text: "Swag Labs"

Test Scenario	Validate error for missing username.

Steps #	Steps Details	Expected Results	Actual Results	Pass / Fail
1	Navigate to https://www.saucedemo.com/	Landing page should load.	Page loaded successfully.	PASS
2	Locate the "Swag Labs" login logo.	Logo should be displayed.	Logo is visible at the top.	PASS
3	Verify logo alignment/visibility.	Logo should be centered.	Branding is clear and visible.	PASS

TEST CASE 08 – PRODUCT ADDITION LOGIC

Test Case ID	TC-CART-008	**Test Case Description**	Product Addition Logic		
Created By	Quendangan, Jacob Conrad M.	**Reviewed By**	Roncesvalles, Ian	**Version**	v2.4.0-build.12
Tester's Name	Quendangan, Jacob Conrad M.	**Date Tested**	Tuesday, March 24, 2026 at 8:49:00 PM	**Test Case (Pass/Fail)**	PASS

S #	Preconditions:
1	User is successfully logged in.
2	Current URL: /inventory.html

S #	Test Data
1	Item: Sauce Labs Backpack
2	Button ID: add-to-cart-sauce-labs-backpack

Test Scenario	Validate that clicking "Add to Cart" updates the button state for a specific item.

Steps #	Steps Details	Expected Results	Actual Results	Pass / Fail
1	Locate the Sauce Labs Backpack item.	Item should be visible.	Product found in list.	PASS
2	Click the "Add to Cart" button.	Button text should change.	Text changed to "Remove".	PASS

TEST CASE 09 – SHOPPING CART UI UPDATE

Test Case ID	TC-CART-009	**Test Case Description**	Shopping Cart UI Update		
Created By	Quendangan, Jacob Conrad M.	**Reviewed By**	Roncesvalles, Ian	**Version**	v2.4.0-build.12
Tester's Name	Quendangan, Jacob Conrad M.	**Date Tested**	Tuesday, March 24, 2026 at 8:50:00 PM	**Test Case (Pass/Fail)**	PASS

S #	Preconditions:
1	User is on the Inventory page.
2	At least one item is being added.

S #	Test Data
1	Badge Class: shopping_cart_badge
2	Expected Value: 1

Test Scenario	Validate numeric badge update on the cart icon.

Steps #	Steps Details	Expected Results	Actual Results	Pass / Fail
1	Click "Add to Cart" on any product.	Item should be processed.	Addition confirmed.	PASS
2	Observe the cart icon at the top right.	A red badge should appear.	Badge "1" is visible.	PASS

TEST CASE 10 – PRODUCT DELETION LOGIC

Test Case ID	TC-CART-010	**Test Case Description**	Product Deletion Logic		
Created By	Quendangan, Jacob Conrad M.	**Reviewed By**	Roncesvalles, Ian	**Version**	v2.4.0-build.12
Tester's Name	Quendangan, Jacob Conrad M.	**Date Tested**	Tuesday, March 24, 2026 at 8:54:00 PM	**Test Case (Pass/Fail)**	PASS

S #	Preconditions:
1	One item is already in the cart.
2	Badge "1" is currently visible.

S #	Test Data
1	Item: Sauce Labs Backpack
2	Action: Click "Remove"

Test Scenario	Validate that "Remove" clears the item from the session.

Steps #	Steps Details	Expected Results	Actual Results	Pass / Fail
1	Click the "Remove" button on the item.	Button text should reset.	Text changed to "Add to Cart".	PASS
2	Observe the cart icon badge.	Badge should disappear.	Badge removed successfully.	PASS

TEST CASE 11 – BULK ADDITION VALIDATION

Test Case ID	TC-CART-011	**Test Case Description**	Bulk Addition Validation		
Created By	Quendangan, Jacob Conrad M.	**Reviewed By**	Roncesvalles, Ian	**Version**	v2.4.0-build.12
Tester's Name	Quendangan, Jacob Conrad M.	**Date Tested**	Tuesday, March 24, 2026 at 8:59:00 PM	**Test Case (Pass/Fail)**	PASS

S #	Preconditions:
1	User is on the Inventory page.
2	Cart is currently empty.
3	Internet browser is open.

S #	Test Data
1	Item 1: Sauce Labs Bike Light
2	Item 2: Sauce Labs Bolt T-Shirt

Test Scenario	Validate badge count for multiple distinct products.

Steps #	Steps Details	Expected Results	Actual Results	Pass / Fail
1	Click "Add to Cart" on the Bike Light.	First item processed.	Item 1 added; Badge shows "1".	PASS
2	Click "Add to Cart" on the Bolt T-Shirt.	Second item processed.	Item 2 added; Badge shows "2".	PASS
3	Verify the badge count.	Badge should display "2".	Badge "2" verified successfully.	PASS

TEST CASE 12 – DATA SORTING INTEGRITY

Test Case ID	TC-CART-012	**Test Case Description**	Data Sorting Integrity		
Created By	Quendangan, Jacob Conrad M.	**Reviewed By**	Roncesvalles, Ian	**Version**	v2.4.0-build.12
Tester's Name	Quendangan, Jacob Conrad M.	**Date Tested**	Tuesday, March 24, 2026 at 9:05:00 PM	**Test Case (Pass/Fail)**	PASS

S #	Preconditions:
1	User is on Inventory page.
2	Dropdown is interactable.

S #	Test Data
1	Selection: Price (low to high)
2	Target Price: $7.99

Test Scenario	Validate "Price (low to high)" filter functionality.

Steps #	Steps Details	Expected Results	Actual Results	Pass / Fail
1	Click the "Remove" button on the item.	Menu should expand.	Filter menu visible.	PASS
2	Select "Price (low to high)".	List should reorder.	Sorting updated.	PASS
3	Verify the first item's price.	Should be the cheapest.	First price is $7.99.	PASS

TEST CASE 13 – INTERNAL LINK REDIRECTION

Test Case ID	TC-CART-013	**Test Case Description**	Internal Link Redirection		
Created By	Quendangan, Jacob Conrad M.	**Reviewed By**	Roncesvalles, Ian	**Version**	v2.4.0-build.12
Tester's Name	Quendangan, Jacob Conrad M.	**Date Tested**	Tuesday, March 24, 2026 at 9:09:00 PM	**Test Case (Pass/Fail)**	PASS

S #	Preconditions:
1	User is logged in.
2	Inventory page is fully loaded.
3	Browser is open.

S #	Test Data
1	URL: saucedemo.com/inventory.html
2	Element: .shopping_cart_link

Test Scenario	Validate navigation from the products page to the cart summary page.

Steps #	Steps Details	Expected Results	Actual Results	Pass / Fail
1	Click the Shopping Cart icon (Top Right).	Redirect to Cart page.	URL is now /cart.html.	PASS
2	Observe the page header.	Title is "Your Cart".	"Your Cart" displayed successfully.	PASS

TEST CASE 14 – REVERSE NAVIGATION LOGIC

Test Case ID	TC-CART-014	**Test Case Description**	Reverse Navigation Logic		
Created By	Quendangan, Jacob Conrad M.	**Reviewed By**	Roncesvalles, Ian	**Version**	v2.4.0-build.12
Tester's Name	Quendangan, Jacob Conrad M.	**Date Tested**	Tuesday, March 24, 2026 at 9:12:00 PM	**Test Case (Pass/Fail)**	PASS

S #	Preconditions:
1	User is currently on the Cart page.
2	Previous URL: /cart.html

S #	Test Data
1	Button ID: continue-shopping
2	Action: Button Click

Test Scenario	Validate return to inventory from the cart view using the "Continue Shopping" button.

Steps #	Steps Details	Expected Results	Actual Results	Pass / Fail
1	Click the "Continue Shopping" button.	Return to products list.	Redirected to /inventory.html.	PASS
2	Verify inventory items load.	Product list should be visible.	Products loaded successfully.	PASS

TEST CASE 15 – PRODUCT INFORMATION ACCESS

Test Case ID	TC-CHECK-015	**Test Case Description**	Product Information Access		
Created By	Roncesvalles, Ian	**Reviewed By**	Escolar, Ken	**Version**	v2.4.0-build.12
Tester's Name	Roncesvalles, Ian	**Date Tested**	Tuesday, March 24, 2026 at 1:16:00 PM	**Test Case (Pass/Fail)**	PASS

S #	Preconditions:
1	User is logged in.
2	Inventory page is loaded.

S #	Test Data
1	Link ID: item_4_title_link
2	Item: Sauce Labs Backpack

Test Scenario	Validate that clicking a product name redirects the user to the specific item's detail page.

Steps #	Steps Details	Expected Results	Actual Results	Pass / Fail
1	Click on the "Sauce Labs Backpack" link.	Redirection to details.	Redirected to /inventory-item.html?id=4.	PASS
2	Verify the product title and image.	Correct info displayed.	Product details rendered successfully.	PASS
3	Observe the "Back to products" button.	Button should be visible.	Navigation button is present.	PASS

TEST CASE 16 – DETAIL-LEVEL PRODUCT ADDITION

Test Case ID	TC-CHECK-016	**Test Case Description**	Detail-Level Product Addition		
Created By	Roncesvalles, Ian	**Reviewed By**	Escolar, Ken	**Version**	v2.4.0-build.12
Tester's Name	Roncesvalles, Ian	**Date Tested**	Tuesday, March 24, 2026 at 1:19:00 PM	**Test Case (Pass/Fail)**	PASS

S #	Preconditions:
1	User is on the Product Detail page.
2	Cart is currently empty.

S #	Test Data
1	Button ID: add-to-cart

Test Scenario	Validate adding a product while inside its detailed view.

Steps #	Steps Details	Expected Results	Actual Results	Pass / Fail
1	Click the "Add to Cart" button.	Item added to session.	Button text changed to "Remove".	PASS
2	Observe the cart icon badge.	Badge count increases.	Badge "1" is visible.	PASS

TEST CASE 17 – CHECKOUT DATA ENTRY

Test Case ID	TC-CHECK-017	**Test Case Description**	Checkout Data Entry		
Created By	Quendangan, Jacob Conrad M.	**Reviewed By**	Roncesvalles, Ian	**Version**	v2.4.0-build.12
Tester's Name	Quendangan, Jacob Conrad M.	**Date Tested**	Tuesday, March 24, 2026 at 1:21:00 PM	**Test Case (Pass/Fail)**	PASS

S #	Preconditions:
1	User has an item in the cart.
2	User is on the Checkout: Your Information page.
3	URL: /checkout-step-one.html

S #	Test Data
1	First Name: Ian
2	Last Name: Tester
3	Zip Code: 1234

Test Scenario	Validate that the checkout form accepts and displays user shipping information.

Steps #	Steps Details	Expected Results	Actual Results	Pass / Fail
1	Input "Ian" into the First Name field.	Field accepts text input.	First Name entered.	PASS
2	Input "Tester" into the Last Name field.	Field accepts text input.	Last Name entered.	PASS
3	Input "1234" into the Zip/Postal Code field.	Field accepts numeric input.	Zip Code entered successfully.	PASS

TEST CASE 18 – TRANSACTION OVERVIEW LOGIC

Test Case ID	TC-CHECK-018	**Test Case Description**	Transaction Overview Logic		
Created By	Roncesvalles, Ian	**Reviewed By**	Escolar, Ken	**Version**	v2.4.0-build.12
Tester's Name	Roncesvalles, Ian	**Date Tested**	Tuesday, March 24, 2026 at 1:24:00 PM	**Test Case (Pass/Fail)**	PASS

S #	Preconditions:
1	Checkout information form is filled out.
2	User is on Step One of checkout.

S #	Test Data
1	Button ID: continue
2	URL Target: /checkout-step-two.html

Test Scenario	Validate redirection to the order overview and pricing summary.

Steps #	Steps Details	Expected Results	Actual Results	Pass / Fail
1	Click the "Continue" button.	Redirect to Overview page.	URL is now /checkout-step-two.html.	PASS
2	Verify item total and tax are displayed.	Totals should be visible.	Price summary rendered correctly.	PASS

TEST CASE 19 – TRANSACTION COMPLETION LOGIC

Test Case ID	TC-CHECK-019	**Test Case Description**	Transaction Completion Logic		
Created By	Roncesvalles, Ian	**Reviewed By**	Escolar, Ken	**Version**	v2.4.0-build.12
Tester's Name	Roncesvalles, Ian	**Date Tested**	Tuesday, March 24, 2026 at 1:27:00 PM	**Test Case (Pass/Fail)**	PASS

S #	Preconditions:
1	User is on the Checkout: Overview page.
2	Total price is verified.

S #	Test Data
1	Button ID: finish
2	Action: Final Click

Test Scenario	Validate the submission of the final order.

Steps #	Steps Details	Expected Results	Actual Results	Pass / Fail
1	Click the "Finish" button.	Order should be submitted.	Redirected to /checkout-complete.html.	PASS
2	Verify the page title.	Title is "Checkout: Complete!".	Page title confirmed.	PASS

TEST CASE 20 – SUCCESS STATE VERIFICATION

Test Case ID	TC-CHECK-020	**Test Case Description**	Success State Verification		
Created By	Quendangan, Jacob Conrad M.	**Reviewed By**	Roncesvalles, Ian	**Version**	v2.4.0-build.12
Tester's Name	Quendangan, Jacob Conrad M.	**Date Tested**	Tuesday, March 24, 2026 at 1:30:00 PM	**Test Case (Pass/Fail)**	PASS

S #	Preconditions:
1	Order has been successfully submitted.
2	User is on the Final page.

S #	Test Data
1	Header Class: .complete-header
2	Expected: "Thank you for your order!"

Test Scenario	Validate the display of the success message header.

Steps #	Steps Details	Expected Results	Actual Results	Pass / Fail
1	Locate the main header text.	Header should be visible.	Header text found.	PASS
2	Verify the confirmation message text.	Must match expected string.	"Thank you for your order!" confirmed.	PASS
3	Observe the "Pony Express" image.	Success image should load.	Image rendered successfully.	PASS

TEST EXECUTION REPORT

SUMMARY OF RESULTS

The manual and automated test suite was executed on March 24, 2026. All 20 automated test cases were executed across three modules.

Ken Escolar Test Execution Report

```
KEN ESCOLAR: AUTHENTICATION & HEADERS
TC01 Passed: Valid Login Verified
Opening sidebar for logout...
TC02 Passed: Logout Successful
TC03 Passed: Invalid Password Alert Verified
TC04 Passed: Locked User Exception Verified
TC05 Passed: Empty Username Validation Verified
TC06 Passed: Browser Title Verified
TC07 Passed: Home UI Component Verified
```

Jacob Quendangan Test Execution Report

```
Tester (JAKE): INVENTORY & CART
TC08 Passed: Item Added
TC09 Passed: Cart Badge Verified
TC10 Passed: Item Removal Verified
TC11 Passed: Multi-item Add Verified
TC12 Passed: Price Sorting Verified
TC13 Passed: Cart Page Navigation Verified
TC14 Passed: Back-to-Products Verified
```

Ian Roncesvalles Test Execution Report

```
RONCESVALLES, IAN TEST: CHECKOUT FLOW
TC15 Passed: Detail View Verified
TC16 Passed: Detail-Add Verified
TC17 Passed: Form Data Entry Verified
TC18 Passed: Checkout Summary Verified
TC19 Passed: Order Submitted
TC20 Passed: Confirmation Header Verified

--- IAN'S MODULE COMPLETED SUCCESSFULLY ---
--- TOTAL GROUP PROGRESS: 20/20 TEST CASES PASSED ---
```

PASS/FAIL COUNT

Module	*Tester*	*Total Cases*	*Pass*	*Fail*
Authentication	Ken Escolar	7	7	0
Inventory & Cart	Jacob Quendangan	7	7	0
Checkout Flow	Ian Roncesvalles	6	6	0
Total		20	20	0

ISSUES FOUND

Although the final test run passed 100%, here are some issues our group identified during the scripting phase:

Latency

One of the testers reported that during initial testing, the load speed of the page is slow, we solve it by using **Explicit Waits** (`until.elementLocated`).

Persona-Specific Defect

The `problem_user` and `visual_user` accounts were found to have hard-coded functional defects (sorting errors and cart removal failures), confirming the SUT's effectiveness as a testing sandbox.

BUG REPORT

Status: No bugs found during manual and automatic testing

Date of Assessment: March 24, 2026

Assessment Result: The system under test (SUT) successfully handled all 20 automated test scenarios without encountering functional deviations, UI glitches, or script interruptions.

Bug ID	Description	Severity	Status
N/A	No bugs identified during final testing.	N/A	**CLOSED**

REFERENCES & APPENDICES

WEB RESOURCE REFERENCES

The following online resources and documentation were utilized to facilitate the design, development, and execution of the automated test suite:

- **System Under Test (SUT):** SauceDemo (Swag Labs)
- **Automation Framework:** Selenium WebDriver Documentation
- **Runtime Environment:** Node.js Official Documentation

Appendix: Test Environment Specifications
To ensure the reproducibility of these results, the following hardware and software configurations were used during the final test run on **March 24, 2026**:

Component	Details
Operating System	Windows 11 Pro
Automation Tool	Selenium WebDriver v4.x
Scripting Language	JavaScript (Node.js v24.11.0)
Target Browser	Microsoft Edge (Chromium)
Driver Version	msedgedriver.exe (Matched to Browser Build)
